

MARKET INFORMATION

Kvidul has been granted an aquaculture permit

Trøndelag County Authority has granted Kvidul AS an aquaculture permit for the production of salmon smolt and harvested fish on land at Brennholmen in Åfjord municipality.

In April 2022, Kvidul applied for an aquaculture permit for the production of 10,000,000 salmon smolts up to 560 grams and 20,000 tonnes of harvested salmon on land at Brennholmen in Åfjord municipality.

The requested biomass was 2,500 tonnes for the smolt and 13,000 tonnes for the harvested fish.

Decision for the aquaculture permit for smolt

Trøndelag County Authority hereby grants Kvidul AS the aquaculture permit TR-AA-9 for salmon smolt at the following location in Åfjord municipality:

Locality no.	Locality name	Geographical coordinates	Map datum
45157	Brennholmen II	64° 2.421' N 10° 1.633' E	Euref89/WGS84

The permit's delimitation of smolt:

<i>Maximum permitted biomass</i>	<i>2,500 tonnes</i>
<i>Quantity</i>	<i>Production of 10,000,000 smolts per year</i>
<i>Biomass</i>	<i>Production of 5,600 tonnes of smolt per year</i>

Decision for the aquaculture permit for harvested fish

Trøndelag County Authority hereby grants Kvidul AS the aquaculture permit TR-AA-8 for harvested salmon on land at the following location in Åfjord municipality:

Locality no.	Locality name	Geographical coordinates	Map datum
45156	Brennholmen	64° 2.505' N 10° 1.905' E	Euref89/WGS84

The permit's delimitation of harvested salmon:

<i>Maximum permitted biomass</i>	<i>13,000 tonnes</i>
----------------------------------	----------------------

The aquaculture permit granted is in line with the biomass that was applied for.

We are very pleased to have received the aquaculture permit for Brennholmen and look forward to starting the detailed design and construction of the facility, which will be the first for the production of harvested salmon on land in Trøndelag.

Trondheim, 28 December 2022
